

Travel Buddy

Doug Wilhelm

School of Applied Technology dwilhel1@hawk.iit.edu A20265006

Anyone on two wheels...

Problem

Gauges often broken / inaccurate

Low-quality from the factory

Expensive / difficult to replace

- No travel information
 - Weather
 - Traffic
- Little vehicle info available
 - Precise data tracking
 - Vehicle status

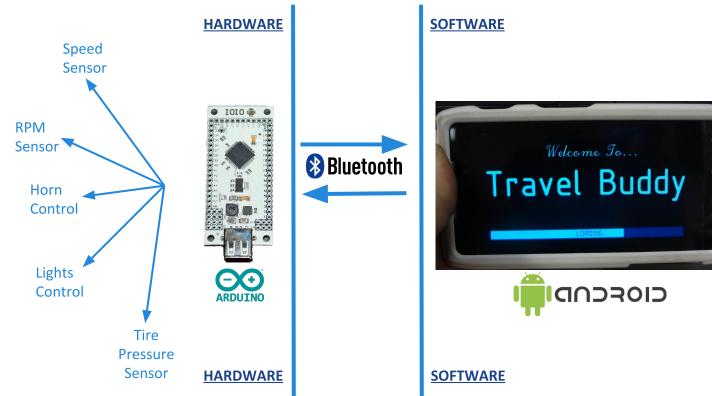

Objective

- Fill the opportunity space...
 - Provide an affordable, reliable, user-friendly software / hardware platform to track and relay data associated with the trip and vehicle.
- This means...
 - CHEAP
 - IT JUST WORKS
 - EASY TO USE

Software & Hardware: Overview

Concept

Prototype

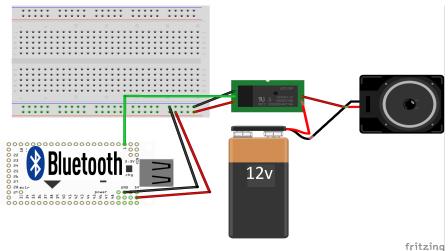

Motorbike **Bicycle**

Phone Usage & Mounting

Hardware

Motorcycle Alarm Circuit (example)

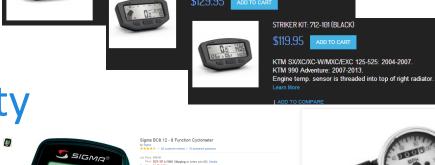

Bicycles

- Arduino / sensors' power source?
 - Solar panel(s)
 - On-board Arduino LIPO battery (rechargeable)
- Sensors?
 - Water level
 - Speed
 - Headwind
 - Sunlight
 - Humidity

The Competition

- High prices
- Sparse functionality
- Poor support
- Low quality

VAPOR KIT: 752-101 (BLACK)

VOYAGER GPS KIT: 912-2058 (BLACK)

\$289.95

Bikers Choice Mini Speedo With LED Indicator Light - 2:1 Drive Ratio 76067

\$59.82
